Letter of Transmittal

December 7, 2010

Honorable Members of the Board of Selectmen and Citizens of the Town of Marblehead, Massachusetts:

It is with pleasure that the Comprehensive Annual Financial Report of the Town of Marblehead, Massachusetts, for the fiscal year ended June 30, 2010, is presented. The financial statements are presented in conformity with accounting principles generally accepted in the United States of America (GAAP) that are audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. This report also complies with the financial reporting model developed by the Governmental Accounting Standards Board (GASB) Statement 34.

In addition to the fund financial information traditionally presented in the Town's financial statements, this report now includes government-wide financial statements. The government-wide financial statements include a Statement of Net Assets that provides the total net assets of the Town including all capital assets (including infrastructure) and the Statement of Activities that shows the cost of providing government services.

The report is designed to be used by the elected and appointed officials of the Town and others who are concerned with its management and progress such as bond analysts, banking institutions and credit raters as well as residents and taxpayers of the Town of Marblehead.

This report consists of management's representations concerning the finances of the Town of Marblehead. Consequently, management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making those representations, management has established an internal control framework that is designed to both protect the assets of the Town from loss, theft or misuse and to allow for the compiling of sufficient reliable information for the preparation of the Town's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the Town's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. To the best of management's knowledge and belief, this financial report is complete and reliable in all material respects.

The Town of Marblehead's financial statements have been audited by Powers & Sullivan, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Town of Marblehead for the fiscal year ended June 30, 2010, are free of material

misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion the Town of Marblehead's financial statements for the fiscal year ended June 30, 2010. The independent auditor's report is presented as the first component of the financial section of this report.

The independent audit of the financial statements of the Town of Marblehead was part of a broader, federally-mandated "Single Audit" designed to meet the special needs of federal grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with legal requirements, with special emphasis on internal controls and legal requirements involving the administration of federal awards. These reports are available in the Town of Marblehead's separately issued Single Audit Report.

GAAP require that management provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to compliment MD&A and should be read in conjunction with it. The Town of Marblehead's MD&A can be found immediately following the report of the independent auditors.

PROFILE OF THE TOWN

The Town of Marblehead, originally incorporated in 1649, is a picturesque seacoast town steeped in history. In its early years fishing and the shoe industry were its two main sources of income. While Marblehead has been known through the years as the "Birthplace of the American Navy," in recent times the Town has also been known as one of the yachting capitals of the world. Pleasure boating is certainly a popular pastime of its residents. Visitors come from all over the world to view the original of the famous painting "The Spirit of '76" which is housed in Abbot Hall in the office of the Board of Selectmen, as well as to see the beautiful harbor crowded with sailing, fishing, lobster and pleasure boats. Another major attraction for visitors is the Town's historic district, the largest in the State, and the narrow crooked streets lined with Colonial and Victorian buildings, many of which have been placed on the National Register.

With a population of 20,377, Marblehead is located in the Greater Boston Area, 18 miles northeast of Boston, with a land area of 4.53 square miles. Marblehead is situated in eastern Massachusetts, bordered by Swampscott on the south, Salem on the southwest, and the Atlantic Ocean on the west, north, and east. Commuter rail service to North Station in Boston is convenient from the Salem or Swampscott stations and Marblehead is a member of the Massachusetts Bay Transportation Authority which provides bus service to Swampscott, Lynn and Boston.

The Town operates under a Board of Selectmen/Open Town Meeting/Town Administrator form of government. The five-member Board of Selectmen, elected annually, makes policy decisions. The Town Administrator is responsible for carrying out the policies and direction of the Board of Selectmen and for managing the day-to-day operations of the Town.

THE REPORTING ENTITY AND ITS SERVICES

The financial reporting entity includes the primary government (the Town of Marblehead) and the Marblehead Contributory Retirement System which is reported as a blended component unit in the Fiduciary Fund financial statements. The primary government includes all funds and activities considered a part of the Town of Marblehead. Specifically excluded are the Marblehead Housing Authority and The North Shore Regional Vocational School District since they have substantial autonomy and separate governmental entity characteristics.

The Town provides a range of municipal services normally associated with municipal government including education, public safety (police, fire and emergency medical services), recreation and parks, elder services (Council on Aging), street construction and maintenance, solid waste collection and disposal, library, cemetery, building inspection and general administrative services. The Town also operates electric, water and sewer utilities and harbor and waterfront services as enterprises.

FACTORS AFFECTING ECONOMIC CONDITION

The Town of Marblehead continues to reflect a relatively strong economic condition. While the Town's residential sales market weakened in fiscal year 2010, it did sustain its value in the most recent valuation when compared to the real estate market regionally and nationally as demonstrated by a modest 2% drop in aggregate value of taxable real property compared to the previous year.

The median family income remained significantly higher than state averages and the unemployment rate continues to be lower than the State average (6.6% vs. 9% for the state). The Town remains a very desirable community given its close proximity to Boston, and for its tourism, history, boating, and the quality of services provided.

Although both the regional and national real estate markets remained weak in fiscal 2010, the Town of Marblehead continued to experience a relatively strong property value base. The total taxable value of the Town decreased only slightly from \$5,350,150,064 in fiscal 2009 to \$5,249,413,281 in fiscal 2010, or a decrease of approximately 1.88%. A number of factors contributed to this relatively strong real estate market, (when compared regionally and nationally), and a stable tax base. Among these factors are the Town's unique geography, encompassing 14.2 miles of coastline, proximity to the City of Boston, and the limited amount of developable land which enhances the desirability for existing housing stock. The Town continues to set new benchmarks for value of oceanfront land, as demonstrated by the increase in the number of multimillion dollar sales of "tear down" properties replaced with new single family dwellings. In fiscal 2010, there were 171 arms length sales, compared to 136 in fiscal 2009. There were only 12 bank related sales out of the nearly 8,000 improved properties in the Town, far less than the regional and national average. Real estate sales activity indicates an increase in the median sale price of nearly \$100,000 providing further evidence of stable or increasing values in the upper end of the value range.

On the Town's operating side, after experiencing increases in state aid between FY05 and FY09, communities have seen decreases in FY10 and FY11 (budgeted). The Town however, is in the position of relying primarily on property taxes (approximately 75% of the Town's general fund revenue base) to cover the increasing cost of providing services.

FINANCIAL AND MANAGEMENT POLICIES

Minimal Changes to Approved Operating Budget Required

The Town's finance committee is responsible for reviewing departmental budget requests and submits to the Town Meeting an operating budget for the proposed expenditures and other financing uses for the next fiscal year. The budget, as enacted by the Town Meeting, also establishes that certain appropriations are to be funded by particular revenues. The original budget can be amended during the fiscal year at Special Town Meetings or at the next Annual Town Meeting held prior to the end of the fiscal year. In FY10 no such budget amendments occurred. During the fiscal year, the finance committee may transfer funds for extraordinary or unforeseen expenditures. The Town appropriated \$144,000 for this purpose in fiscal 2010 and transfers of \$95,487 were made from this appropriation. State Law also allows for certain transfers between department appropriations during the last 60 days of the fiscal year if approved by both the Finance Committee and the Board of Selectmen.

In Fiscal Year 2010, one transfer of \$40,000 under this provision of the law was necessary. All unencumbered and unexpended appropriations lapse at year-end.

Formal budgetary integration is employed as a management control device during the year for the General Fund, Capital Projects Fund as well as the Sewer, Water and Harbor Enterprise Funds. Although formal budgetary integration is not employed for Special Revenue Funds, effective budgetary control is alternatively achieved through provisions of the Massachusetts General Laws and the Town's by-laws.

Appropriations are authorized by the Town Meeting for line items within departments. Typical line items are salaries, expense and local travel. These are the legal levels of budgetary control (level at which expenditures may not exceed budget). However, the Town is statutorily required to pay debt service, regardless of whether such amounts are appropriated. Additionally, expenditures for disasters, natural or otherwise, and final legal judgments may exceed the level of spending authorized by majority vote at a Town Meeting.

Long-Term Financial Planning

The Town manages its financial matters in a prudent manner. This has been affirmed by its ability to maintain its AAA bond rating even through the turbulent financial period that has been experienced nationally over the past couple of years. The Town's financial actions are generally guided by multi-year planning tools, pay-as-you-go financing strategies for certain capital investments, long-term planning for liabilities such as its pension obligations, strategic reorganizations of certain municipal services, and establishment of reserves to alleviate volatility in departmental budgets.

The Town of Marblehead has also enhanced its revenue flexibility by establishing totally self-sufficient enterprise funds for sewer, water, electric and harbor operations. All costs related to the enterprises are funded through user fees and each enterprise pays the Town for its share of general government services. Currently each of the enterprises avoids the issuance of new debt for capital improvements. Instead each enterprise funds its capital projects from net assets.

Increased Undesignated Fund Balance in General Fund Trend Continues

The Town's management of its finances has resulted in a continued upward trend in General Fund equity. At the end of FY10, the undesignated fund balance in the General Fund increased again for the sixth consecutive year. Since FY2004, General Fund undesignated fund balance at year end has increased 290%.

Property Tax Collection Rates Remain Consistently High

The Town has consistently had a first collection rate for net property taxes due in excess of 99%. This collection rate was achieved again in FY2010.

Establishment of Energy Reserve to Manage Energy Cost Volatility

In response to volatile energy costs, the Town established an Energy Reserve beginning with its Fiscal Year 2007 Operating budget. Departments with energy costs are allowed to access this reserve after they exhaust their entire departmental budget for various forms of energy (heating, electricity, and motor vehicle fuel). The use of the reserve has accomplished two important goals. First, it alleviated pressure on departmental budgets that had been historically pitting increased energy costs against other needs. Second, the reserve ensured that the monies appropriated for increased energy costs were not used for other purposes. The Town appropriated \$485,040 into the fiscal 2010 energy reserve. Of this amount \$233,068 was expended. The Town has once again increased its allocation to its energy reserve in the FY11 budget appropriating \$533,580 for this purpose.

SIGNIFICANT EVENTS

Town's AAA Bond Rating Affirmed

In August of 2010, the Town issued Notes and Bonds for capital projects. In the process of preparing for these financings the Town was reviewed by the independent rating agency of Standard and Poor's (S&P). After careful review of the Town's finances and management practices, S&P affirmed the Town's Bond rating at AAA, their highest municipal rating.

Village School Reconstruction Project Nears Completion

During FY10 the Village School Reconstruction neared completion. With completion of the project scheduled for the end of August 2010. This project focuses on replacing core facility systems including heat, air circulation, wiring, roof, and window components, as well as bringing the building into accordance with accessibility and life/safety code regulations. This project has been approved by the Massachusetts School Building Authority for state funding. The state is funding approximately 40% of the project's cost.

Town Website Continues to Expand Its Features

The Official Town website (www.marblehead.org) was activated in January 2006. The website features separate pages for each of the Town's departments with full information concerning doing business with the Town of Marblehead. Residents are able to access various town forms, pay their property and auto excise taxes on line, and access the latest information concerning various public meetings and town news. In FY10, the website continued to be enhanced with the addition of an on-line payment option for Water and Sewer bills. The town also began consistently posting agendas for various public meetings in FY10 on the website. The independent group Common Cause recognized the Town's website by awarding its e-Government Award with distinction for transparency in 2010.

Equipment Purchased

The Town purchased and took delivery of several new pieces of heavy equipment in FY10. This is included by department:

Park & Recreation Departments:	Dump Truck
	Riding Mower
Tree Department:	Stump Grinder
Highway Department:	2 Trucks with Sanders
Police Department:	2 Police Vehicles
Fire Department	Utility Vehicle
Cemetery Department:	Pick-up Truck
Sewer Department:	Utility Vehicle

Employee/ Retiree Health Coverage – Modified

Beginning in FY09, the Town began providing health coverage for its employees and retirees on a fully-insured basis. Effective July 1, 2008 the Town began purchasing health insurance from the Massachusetts Interlocal Insurance Association (MIIA). MIIA is the insurance arm of the Massachusetts Municipal Association (MMA), a private, nonprofit and nonpartisan organization of cities and towns. In 1992 MIIA established the MIIA Health Benefits Trust to serve the health benefit needs of local government. The Trust was established pursuant to M.G.L. Chapter 32B Section 12 and is now one of the largest pools in the nation. The move to a fully insured health plan has both stabilized the health care costs of the Town and reduced the risk undertaken by the Town over the past two fiscal years. In FY10 through the collective bargaining process agreement was reached to

modify the health plans offered to employees and retirees. These changes are expected to further stabilize the health insurance costs of the town.

MIIA Health Benefits Trust Presents Award to the Town for Its Wellness Programs

As part of purchasing health coverage from MIIA, the Town is provided with resources from MIIA to plan and conduct wellness programs for its employees. During FY10, the town was recognized by the MIIA Health Benefits Trust as their best Wellness Program for a large account. The Town continues to have an active Wellness Committee that plans after work programs for employees focusing on nutrition and physical fitness.

Results Of June 15th Override Ballot

The Annual Town Meeting held in May 2010 approved two one-time Capital Improvement override questions and several debt exclusion override questions that were placed on a referendum ballot held on June 15, 2010. All of these questions were disapproved by the voters. None of these ballot questions had a direct effect on the Town's FY2011 operating budget.

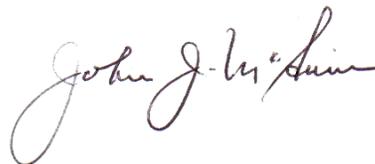

Awards and Acknowledgements

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Town of Marblehead for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2009. This was the sixth consecutive year that the Town submitted a CAFR to the GFOA. The Town was awarded this Certificate all six years. In order to receive this prestigious award, a government had to publish an easily readable and efficiently organized CAFR that satisfied both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

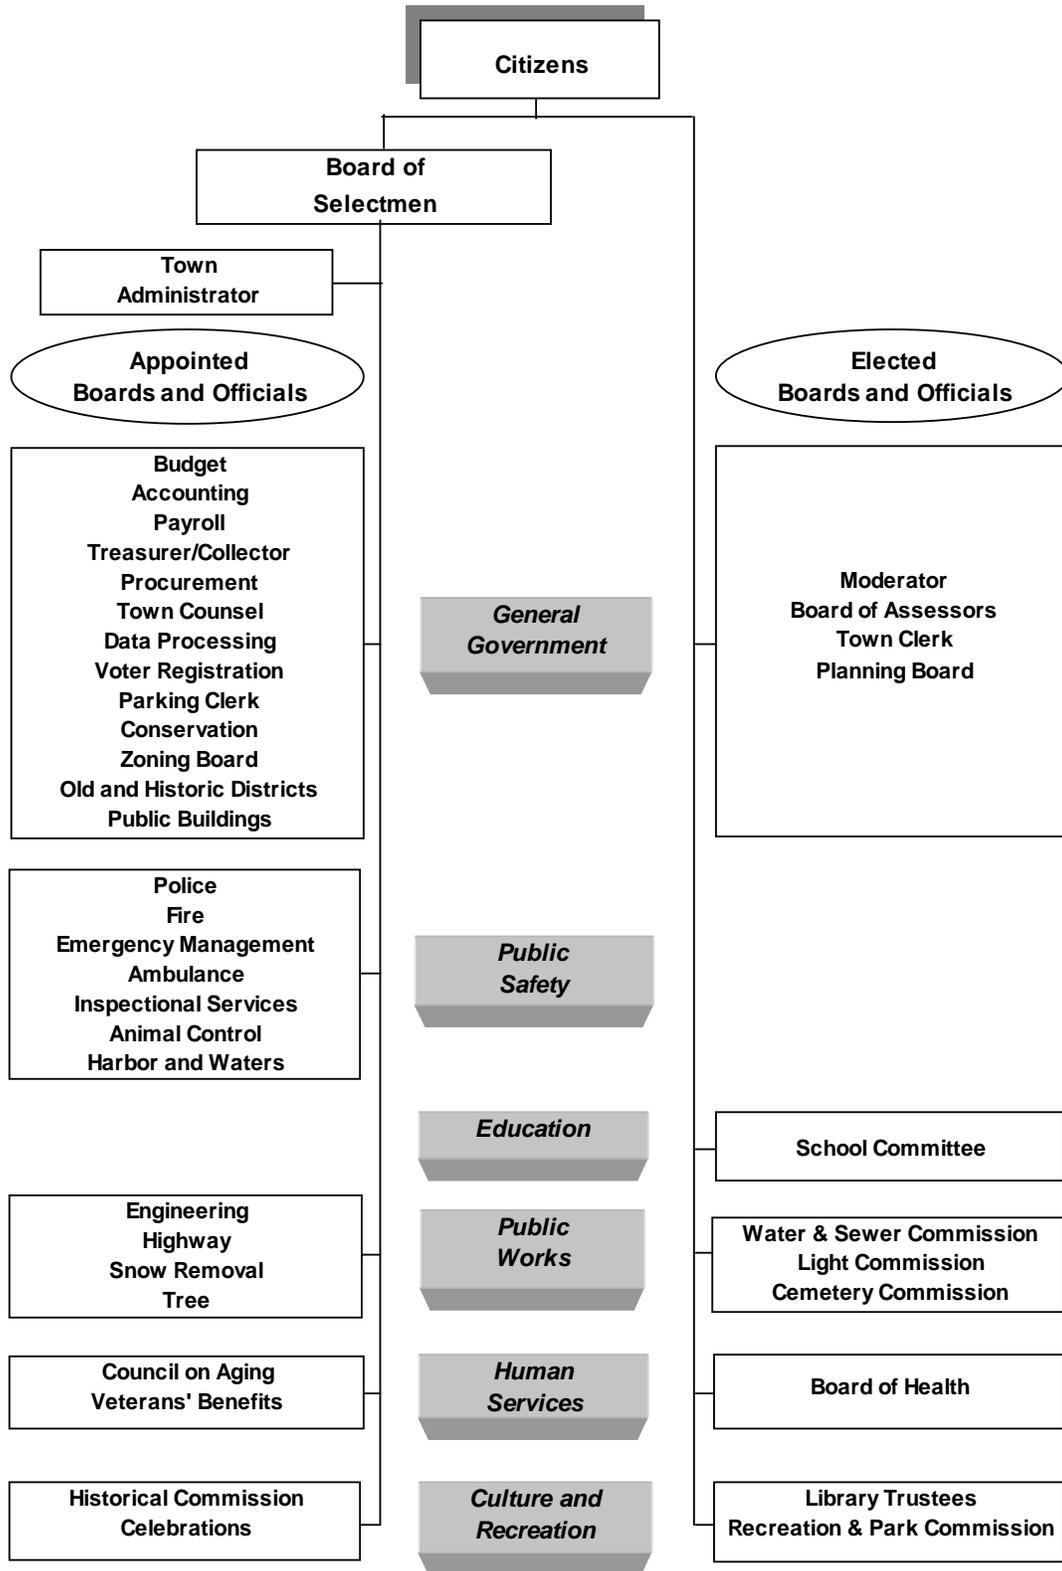

The preparation of this report on a timely basis could not be accomplished without the efficient and dedicated staff of the Financial Services Department. I would like to express my appreciation to all members of the Town's Financial Services Department who assisted and contributed to the preparation of this report. I would also like to thank the Board of Selectmen, the Board of Assessors, the Finance Committee and Town Administrator, Anthony M. Sasso for their strong interest and support in planning and conducting the financial operations of the Town in a responsible and progressive manner.

Respectfully submitted,

John McGinn
Finance Director

Independent Auditors' Report

To the Honorable Board of Selectmen
Marblehead, Massachusetts

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Marblehead, Massachusetts, as of and for the fiscal year ended June 30, 2010 (except for the Marblehead Contributory Retirement System and the Marblehead Municipal Light Department which are as of and for the year ended December 31, 2009), which collectively comprise the Town's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Town of Marblehead, Massachusetts' management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the Marblehead Municipal Light Department, which is both a major fund and 45%, 43%, and 65%, respectively, of the assets, net assets, and revenues of the business-type activities, for the fiscal year ended December 31, 2009. Those financial statements were audited by other auditors whose report thereon has been furnished to us, and our opinion, insofar as it relates to the amounts included in these financial statements is based solely on the report of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

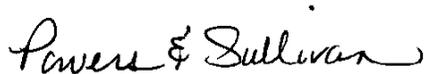

In our opinion, based on our audit and the report of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Marblehead, Massachusetts, as of June 30, 2010 (except for the Marblehead Contributory Retirement System and the Marblehead Municipal Light Department which are as of and for the year ended December 31, 2009), and the respective changes in financial position and cash flows, where applicable, thereof for the fiscal year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 7, 2010 on our consideration of the Town of Marblehead, Massachusetts' internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The combining and individual fund statements and schedules, as listed in the table of contents, are presented for the purpose of supplementary analysis and are not a required part of the basic financial statements of the Town of Marblehead, Massachusetts. Such supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly presented in all material respects in relation to the basic financial statements taken as a whole.

Management's discussion and analysis, located on the following pages, and the general fund schedule of revenues, expenditures and changes in fund balance-budgetary basis, other postemployment benefit plan schedule of funding progress and employer contributions, and other postemployment benefit plan actuarial methods and assumptions, located after the notes to the basic financial statements, are not a required part of the basic financial statements but are supplementary information required by the accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management, regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

The introductory section and statistical section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

A handwritten signature in cursive script that reads "Powers & Sullivan".

December 7, 2010

Management's Discussion and Analysis

As management of the Town of Marblehead, we offer readers of these financial statements this narrative overview and analysis of the financial activities for the fiscal year ended June 30, 2010. We encourage readers to consider the information presented in this report in conjunction with the information that we have provided in our letter of transmittal. All amounts, unless otherwise indicated, are expressed in whole dollars.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Town of Marblehead's basic financial statements. These basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. The government-wide financial statements provide both long-term and short-term information about the Town as a whole. The fund financial statements focus on the individual components of the Town government, reporting the Town's operations in more detail than the government-wide statements. Both presentations (government-wide and fund) allow the user to address relevant questions, broaden the basis of comparison and enhance the Town's accountability. An additional part of the basic financial statements are the notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The *government-wide financial statements* are designed to provide readers with a broad overview of finances, in a manner similar to private-sector business.

The *statement of net assets* presents information on all assets and liabilities, with the difference between the two reported as *net assets*. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position is improving or deteriorating.

The *statement of activities* presents information showing how the government's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities include general government, public safety, education, public works, landfill closure, human services, culture and recreation, and interest. The business-type activities include the activities of the sewer, water, harbor and municipal light departments.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. All of the funds can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. *Governmental funds* are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund statements focus on *near-term inflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The Town of Marblehead adopts an annual appropriated budget for its general fund. A budgetary comparison schedule has been provided as required supplementary information for the general fund to demonstrate compliance with this budget.

Proprietary funds. The Town maintains two types of proprietary funds.

Enterprise funds are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The Town uses enterprise funds to account for its sewer, water, harbor and light department activities.

Internal service funds are an accounting device used to accumulate and allocate costs internally among the Town's various functions. The Town uses internal service funds to account for Town appropriations and employee contributions used to fund Workers' Compensation Claims, Medical Claims and Medex claims to supplement Medicare. Because these services predominantly benefit the governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* reflected in the government-wide financial statement because the resources of those funds are *not* available to support the Town's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

Notes to the basic financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Government-wide Financial Analysis

At the end of the current fiscal year, the Town is able to report positive balances in the all but the unrestricted category of governmental net assets. Overall the net assets of the primary government increased by \$87,400 during fiscal year 2010. This was comprised of a \$622,900 decrease in governmental net assets and a \$710,400 increase in business-type net assets.

Governmental Activities

As noted earlier, net assets may serve over time as a useful indicator of a government's financial position. For the governmental activities, Marblehead's assets exceeded liabilities by \$79.6 million, at the close of fiscal year 2010.

	Governmental Activities

Governmental net assets of \$70.7 million (89%) reflects its investment in capital assets (e.g., land, construction in progress, buildings, building improvements, machinery, and equipment and infrastructure); less any related debt used to acquire those assets that are still outstanding. The Town uses these capital assets to provide services to

citizens; consequently, these assets are *not* available for future spending. Although the investment in its capital assets is reported net of its related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the net assets \$9.4 million (12%) represents resources that are subject to external restrictions on how they may be used. The remaining balance of *unrestricted net assets* has a year end deficit balance of \$510,000. The primary reason for this deficit balance in net assets is the recognition of other postemployment benefit liability of \$7.4 million, which was the result of the implementation of Government Auditing Standards Board (GASB) Statement 45. Fiscal year 2009 was the Town's initial year for the implementation of GASB Statement 45. This statement required the Town to obtain an actuarial valuation of the Town's liability to pay other postemployment benefits to current employees and retirees. The Town is allowed to amortize the liability, which totaled \$117 million, over 30 years. Since there is no legal obligation to fund the liability at this time, the Town has opted to continue to fund other postemployment benefits on a pay-as-you-go basis. As a result the Town is required to record the difference between the current year pay-as-you-go cost and the current year actuarial determined cost as a liability in the full accrual financial statements. This difference totaled \$3.7 million for fiscal year 2010.

Other items having an impact on the change in net assets include an increase of \$1.8 million in the estimated costs for the closure and postclosure care for the landfill, the recognition of \$3.5 million in capital grants from the Massachusetts School Building Authority as reimbursement for certain costs related to the Village School and Glover School Projects, \$359,000 in capital grants received from the state for road projects, and lower than anticipated health insurance costs as the Town changed to a premium based plan for employees.

The governmental expenses totaled \$79.3 million of which \$23.4 million (30%) was directly supported by program revenues consisting of charges for services, operating and capital grants and contributions. General revenues totaled \$54.6 million, primarily coming from property taxes, motor vehicle and other excise, and non-restricted state aid.

Business-type Activities

For the Town's business-type activities, assets exceeded liabilities by \$48.1 million at the close of fiscal year 2010.

Business-type net assets of \$33.7 million (70%) represent investments in capital assets net of related debt. The remaining \$14.4 million (30%) is available to be used for the ongoing operation of the Town's Water, Sewer, Harbor and Municipal Light activities. There was an increase of \$710,000 in total net assets reported in the business-type activities.

The Town's Sewer, Water, and Harbor funds have a policy of appropriating available funds at the end of each fiscal year to fund capital expenses in lieu of issuing long-term debt. As a result, the net assets remain relatively consistent from year to year.

	Business-type Activities	
	2010	2009
Assets:		
Current assets.....	\$ 17,603,314	\$ 18,152,280

The Sewer Enterprise Fund's net assets totaled \$11.7 million at year end; an increase of \$197,000 from the prior year. This balance is approximately 3.5 times the annual operating expenses and has remained consistent over the past several years. Revenues in this fund consist primarily of charges for sewer services and approximately 60% of the Fund's expenses relate to the annual assessment paid to the South Essex Sewerage District.

The Water Enterprise Fund's net assets totaled \$11.5 million at year end; an increase of \$143,000 from the prior year. This balance is approximately 3.8 times the annual operating expenses and has remained consistent over the past several years. Revenues in this fund consist primarily of charges for water service and approximately 58% of the operating expenses consist of assessments paid to the Massachusetts Water Resource Authority.

The Harbor Enterprise Fund's net assets increased by \$90,000 and totaled \$4.3 million at year end. The balance in the Harbor Enterprise Fund has remained consistent over the past several years. Revenues in this fund consist of a combination of charges for services and boat excise taxes assessed.

The Municipal Light Enterprise Fund's net assets totaled \$20.6 million at year end, an increase of \$281,000. The majority of the revenue in this fund consists of charges for services and 86% of the expenses relate to operational costs.

Financial Analysis of the Government's Funds

As noted earlier, the Town uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable* resources. Such information is useful in assessing financing requirements. In particular, *unreserved fund balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, governmental funds reported combined ending fund balances of \$23.7 million, a decrease of \$6.5 million from the prior year.

The General Fund is the chief operating fund. At the end of the current fiscal year, unreserved fund balance of the General Fund was \$9.2 million, while total fund balance was \$9.8 million. Of the unreserved fund balance, \$4.3 million has been allocated to balance the fiscal year 2011 budget. As a measure of the general fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures. Unreserved fund balance represents 13.6% of total general fund expenditures, while total fund balance represents 14.5% of that same amount.

The General Fund increased by \$874,000. This increase is primarily due to reasonable spending, higher than anticipated revenue collections and lower than anticipated group insurance and public safety salary costs.

The Capital Projects Fund is used to account for the financial activities associated with major capital projects that have been authorized by Town Meeting and approved by the voters to be funded by the proceeds of bond sales. In fiscal year 2009, the Town began renovation on the Village School and has continued with the construction through fiscal 2010. In May 2008, Town Meeting authorized \$21.8 million for this project. Over the last three fiscal years, the Town has borrowed approximately \$14.1 million to finance the Village School renovation project. The fund had a net decrease of approximately \$7.7 million during fiscal year 2010. This net decrease was primarily due to the recognition of \$2.6 million in bond proceeds, \$3 million in MSBA grant payments and capital expenditures of approximately \$13.3 million, of which most related to the Village School renovation project.

The Public Funds Major Fund is used to account for contributions and earnings to support the government, where the principal portion is non-expendable. This fund had a net decrease of \$38,000 during fiscal year 2010. Revenues consisting of investment income as well as contributions, and expenditures, totaling \$118,000, were for general government, public works, human services, and culture and recreational purposes. The largest portion of this fund, \$3.4 million, is permanently reserved for investment purposes.

General Fund Budgetary Highlights

The Town experienced a \$2.5 million surplus of actual revenues compared to budgeted revenues. The surplus in motor vehicle excises taxes, charges for services and license and permits, and intergovernmental revenue totaling \$2.2 million was due to conservative budget estimates. Additionally, investment income came in higher than budgeted by \$159,000 due to the Town pursuing the highest interest rates available on accounts and conservative budget estimates.

Actual expenditures ended the fiscal year approximately \$1.7 million under budget. The most notable is the group insurance appropriation, which ended the fiscal year \$575,000 under budget. This was the result of health insurance costs being transferred to the Medex trust fund to cover Medicare costs. The Town transferred from a self-insured program to a premium based plan beginning in fiscal year 2009, and actual costs came in lower than anticipated, further contributing to a positive budget to actual variance. The positive variance under public safety is the result of employee turnover and increased tracking of employee related expenditures including salaries and overtime.

In addition the Town had positive balances remaining for the energy reserve and property and liability insurance due to conservative budgeting and ongoing review of costs relating to insurance.

The only other changes between the original and final budget for the Town consisted of transfers within appropriation lines, and a transfer from the education budget to fund a deficit within the school lunch fund.

Capital Asset and Debt Administration

Capital assets. In conjunction with the operating budget, departments with proposed capital budgets submit them to the Finance Committee and if large enough, to the Capital Planning Committee. These committees are responsible for reviewing the proposed capital budgets and reporting to the Annual Town Meeting. The major capital asset activity of the governmental activities during the year consisted of the Village School Reconstruction project of \$11.9 million and upgrades to infrastructure of \$878,000. Of the \$878,000, \$322,000 was in relation to the drain construction, \$277,000 in street and sidewalk paving, and \$279,000 was used for the causeway seawall. Other capital asset activity consisted of building improvements of \$162,000 on various Town buildings and the purchase of new vehicles and equipment for various Town departments in the amount of \$913,000.

Capital additions of the business-type activities consisted of upgrades to infrastructure and purchases of new equipment in the Sewer and Water activities of approximately \$364,000 and \$498,000, respectively; purchase of equipment in the Harbor activities of \$48,000; and Municipal Light upgrades to plant and equipment of approximately \$2.5 million.

Debt administration. Outstanding long-term debt of the general government, as of June 30, 2010, totaled \$42.5 million, of which \$34.9 million is related to school projects, \$6.5 million is for the causeway seawall, \$600,000 relates to design and engineering of transfer station, and \$500,000 is for drain projects.

Please refer to the notes 5, 6 and 7 of the basic financial statements for further discussion of the Town's major capital and debt activity.

Requests for Information

This financial report is designed to provide a general overview of the Town of Marblehead's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Director, Mary Alley Building, 7 Widger Road, Marblehead, Massachusetts 01945.

**RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES**

FISCAL YEAR ENDED JUNE 30, 2010

Net change in fund balances - total governmental funds.....		\$ (6,470,564)
<p>Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.</p>		
Capital outlay.....	14,103,307	
Depreciation expense.....	<u>(3,933,041)</u>	
Net effect of reporting capital assets.....		10,170,266
<p>Revenues in the Statement of Activities that do not provide current financial resources are fully deferred in the Statement of Revenues, Expenditures and Changes in Fund Balances. Therefore, the recognition of revenue for various types of accounts receivable (i.e., real estate and personal property, motor vehicle excise, etc.) differ between the two statements. This amount represents the net change in deferred revenue.....</p>		
		849,911
<p>The issuance of long-term debt (e.g., bonds and leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the financial resources of governmental funds. Neither transaction, however, has any effect on net assets. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the Statement of Activities.</p>		
Issuance of debt.....	(2,618,000)	
Issuance of refunding bonds.....	11,782,000	
Payments of current refunded debt.....	(11,782,000)	
Amortization of bond premiums.....	57,388	
Debt service principal payments.....	<u>2,820,000</u>	
Net effect of reporting long-term debt.....		259,388
<p>Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds.</p>		
Net change in compensated absences accrual.....	(31,592)	
Net change in landfill liability accrual.....	(1,800,000)	
Net change in accrued interest on long-term debt.....	295,994	
Net change in other postemployment benefits.....	<u>(3,654,704)</u>	
Net effect of recording long-term liabilities and amortizing deferred losses.....		(5,190,302)
<p>Internal service funds are used by management to account for health insurance and workers' compensation activities.</p>		
The net activity of internal service funds is reported with Governmental Activities.....		<u>(241,648)</u>
Change in net assets of governmental activities.....		<u>\$ (622,949)</u>

See notes to basic financial statements.

NET ASSETS AT END OF YEAR.....	\$ 70,321,708	\$ 3,472,464

See notes to basic financial statements.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying summary of the Town of Marblehead's significant accounting policies is presented to assist the reader in interpreting the financial statements and other data in this report. These policies, as presented, should be viewed as an integral part of the accompanying financial statements. The financial statements and notes are representations of the Town's management, which is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principals (GAAP), as applicable to governments, and have been consistently applied in the preparation of the financial statements. The Governmental Accounting Standards Board (GASB) is the recognized standard-setting body for establishing governmental accounting and financial reporting principles.

A. Reporting Entity

The Town of Marblehead is a municipal corporation that is governed by an elected five member Board of Selectmen.

For financial reporting purposes, the Town has included all funds, organizations, agencies, boards, commissions and institutions. As required by generally accepted accounting principles, these financial statements present the government and its component units, entities for which the Town is considered to be financially accountable. Component units, although legally separate entities, are, in substance, part of the government's operations and data from these units are combined with the data of the primary government. Specifically excluded from the Town's financial statements because they are autonomous entities or agencies are the Marblehead Housing Authority and North Shore Regional Vocational School District.

Blended component units are entities which are legally separate from the Town, but are so related to the Town that they are, in substance, the same as the Town or entities providing services entirely or almost entirely for the benefit of the Town. The Marblehead Contributory Retirement System (the System) is blended within the Primary Government as a Pension Trust Fund within the Fiduciary Fund financial statements. The System is governed by a five member board comprised of the Town's Finance Director (ex-officio), two elected members and one member appointed by the Board of Selectmen and one member appointed by the Board members. The System is a legally separate entity, but the nature and significance of its relationship with the Town warrants inclusion in the basic financial statements. The System is presented using the accrual basis of accounting. The System issues a publicly available unaudited financial report in accordance with guidelines established by the Commonwealth of Massachusetts' Public Employee Retirement Administration Commission (PERAC). That report may be obtained by contacting the System at 7 Widger Road, Marblehead, MA 01945.

The Town presents the financial position of the Marblehead Municipal Light Plant (MMLP) and the results of its operations on a calendar year basis as an Enterprise Fund in the Proprietary Fund Financial Statements. The MMLP maintains a separate set of books and records on a calendar year basis, and issues yearly financial statements. The MMLP's financial statements for the year ended December 31, 2009, were audited by other independent public accountants. A copy of the report can be obtained by contacting the MMLP at 80 Commercial Street, Marblehead, MA 01945.

The Town is a member of the South Essex Sewerage District (the District), a joint venture with the Cities of Salem, Peabody and Beverly and the Towns of Marblehead and Danvers, for the operation of a septage disposal facility. The members share in overseeing the operations of the District. Each member is responsible for its proportionate share of the operational costs of the District, which are paid in the form of assessments. As of June 30, 2010, the Town's equity interest in the operations of the District is \$1,174,370, which is recorded in the Sewer Enterprise Fund. Complete financial statements can be obtained directly from their administrative offices located at 50 Fort Avenue, Salem, MA 01970.

B. Government-Wide and Fund Financial Statements

Government-Wide Financial Statements

The government-wide financial statements (i.e. statement of net assets and the statement of changes in net assets) report information on all of the non-fiduciary activities of the primary government and its component units. Governmental activities, which are primarily supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which are supported primarily by user fees and charges.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though fiduciary funds are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements. Nonmajor funds are aggregated and displayed in a single column.

Major Fund Criteria

Major funds must be reported if the following criteria are met:

- If total assets, liabilities, revenues, or expenditures/expenses of an individual governmental or enterprise fund are at least 10 percent of the corresponding element (assets, liabilities, etc.) for all funds of that category or type (total governmental or total enterprise funds), and
- If the total assets, liabilities, revenues, or expenditures/expenses of the individual governmental fund or enterprise fund are at least 5 percent of the corresponding element for all governmental and enterprise funds combined.

Additionally, any other governmental or enterprise fund that management believes is particularly significant to the basic financial statements may be reported as a major fund.

Internal service funds and fiduciary funds are reported by fund type.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

Government-Wide Financial Statements

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred. Real estate and personal property taxes are recognized as revenues in the fiscal year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The statement of activities demonstrates the degree to which the direct expenses of a particular function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include the following:

- Charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment.

- Grants and contributions that are restricted to meeting the operation requirements of a particular function or segment.
- Grants and contributions that are restricted to meeting the capital requirements of a particular function or segment.

Taxes and other items are not identifiable as program revenues and are reported as general revenues.

For the most part, the effect of interfund activity has been removed from the government-wide financial statements. However, the effect of interfund services provided and used between functions is not eliminated as the elimination of these charges would distort the direct costs and program revenues reported for the functions affected.

Fund Financial Statements

Governmental funds are accounted for using the flow of current financial resources measurement focus and the modified accrual basis of accounting. Under the modified accrual basis of accounting, revenues are recognized when susceptible to accrual (i.e., measurable and available). Measurable means the amount of the transaction can be determined and available means collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures are recorded when the related fund liability is incurred, except for unmatured interest on general long-term debt which is recognized when due, and certain compensated absences, claims and judgments which are recognized when the obligations are expected to be liquidated with current expendable available resources.

Property taxes, excise taxes, and trash user charges are considered available if they are collected within 60 days after fiscal year-end. Investment income is susceptible to accrual. Other receipts and tax revenues become available when the cash is received and are recognized as revenue at that time.

Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria is met. Expenditure driven grants recognize revenue when the qualifying expenditures are incurred and all other grant requirements are met.

The following major governmental funds are reported:

The *General Fund* is the primary operating fund. It is used to account for all financial resources, except those required to be accounted for in another fund.

The *Capital Projects Fund* is used to account for the financial activities associated with major capital projects that have been authorized by Town Meeting and approved by the voters to be funded by the proceeds of bonds sales.

The *Public Funds* are the Town's *Permanent Funds* which are used to account for financial resources that are legally restricted to the extent that only earnings, not principal, may be used for purposes that support the governmental programs.

The nonmajor governmental funds consist of special revenue funds that are aggregated and presented in the *nonmajor governmental funds* column on the governmental funds financial statements. The following describe the general use of this fund type:

The *Special Revenue Funds* are used to account for the proceeds of specific revenue sources (other than permanent trusts or for major capital projects) that are legally restricted to expenditures for specified purposes.

Proprietary funds are accounted for using the flow of economic resources measurement focus and use the accrual basis of accounting. Under this method, revenues are recorded when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the proprietary funds principal ongoing operations. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

The following major enterprise funds are reported:

The *Water* enterprise fund is used to account for the Town's water activities.

The *Sewer* enterprise fund is used to account for the Town's sewer activities.

The *Harbor* enterprise fund is used to account for the Town's harbor activities.

The *Municipal Light* enterprise fund is used to account for the Town's electricity activities.

The *Internal Service Funds* are used to account for the financing of services provided by one department to other departments or governmental units.

The following activities within the internal service fund are reported:

The medical claims activity is used to account for Town and employee and retiree contributions and investment earnings which are used to pay medical claims of the Town's employees and covered dependents.

The medex claims activity is used to account for Town and retiree contributions and investment earnings which are used to pay medical claims of the Town's retired employees over the age of 65 as a supplement to medicare.

The workers' compensation activity is used to account for Town appropriations and investment earnings which are expended for the payment of injury claims, resulting from on-the-job accidents of Town employees.

Fiduciary funds are reported using the flow of economic resources measurement focus and use the accrual basis of accounting excluding Agency Funds. Fiduciary funds are used to account for assets held in a trustee capacity for others that cannot be used to support the governmental programs.

The following Fiduciary funds are reported:

The *private-purpose trust fund* is used to account for trust arrangements that exclusively benefit individuals, private organizations, or other governments. Some of these trusts have donor restrictions and trustee policies that do not allow the endowment portion and any unrealized appreciation to be spent. The donor restrictions and trustee policies only allow the trustees to authorize spending of the realized investment earnings. The Town's educational scholarships and assistance to benefit the needy are accounted for in this fund.

The *agency fund* is used to account for assets held in a purely custodial capacity. Agency funds apply the accrual basis of accounting but do not have a measurement focus. The Town's agency fund consist of performance bonds and the collection and payment of hunting and fishing licenses, firearm permits, sales taxes, meals taxes, and dog licenses to the State, proceeds of extra work details to the Town employees, and school student activity accounts.

The *pension trust fund* is used to account for the activities of the System, which accumulates resources to provide pension benefits to eligible retirees and their beneficiaries.

Government-Wide and Fund Financial Statements

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

D. Cash and Investments

Government-Wide and Fund Financial Statements

Cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with an original maturity of three months or less from the date of acquisition.

Investments are carried at fair value. The fair values were determined by the closing price for those securities traded on national stock exchanges and at the average bid-and-asked quotation for those securities traded in the over-the-counter market. The fair value of real estate investments is based upon independent appraisals. Investments that do not have an established market are reported at estimated fair values.

E. Accounts Receivable and Allowance for Uncollectible Accounts

Government-Wide and Fund Financial Statements

The recognition of revenue related to accounts receivable reported in the government-wide financial statements and the proprietary and fiduciary funds financial statements are reported under the accrual basis of accounting. The recognition of revenue related to accounts reported in the governmental funds financial statements are reported under the modified accrual basis of accounting.

Real and personal property taxes are based upon values assessed as of January 1 and are levied each July for the following fiscal year ending June 30. Taxes for each year are due in quarterly installments and are normally payable August 1, November 1, February 1 and May 1. Interest accrues on delinquent taxes and is recognized

as revenue when received. Tax liens are processed within twelve months after the close of the valuation year on delinquent properties.

The persons against whom real or personal property taxes are assessed are personally liable for the tax (subject to bankruptcy and insolvency laws). In the case of real property, this personal liability is effectively extinguished by the sale or taking of the property by the Town.

Motor vehicle excise taxes are assessed annually for each vehicle registered and are recorded as receivables in the fiscal year of the levy. The Commonwealth is responsible for reporting the number of vehicles registered and the fair values of those vehicles. The tax calculation is the fair value of the vehicle multiplied by \$25 per \$1,000 of value.

Boat excise taxes are assessed annually for each boat registered and are recorded as receivables in the fiscal year of the levy. The Commonwealth is responsible for reporting the number of boats registered and the fair value of those boats. The tax calculation is the fair value of the boat multiplied by \$10 per \$1,000 of value.

Various federal and state grants for operating and capital purposes are applied for and received annually. For non-expenditure driven grants, receivables are recorded as soon as all eligibility requirements imposed by the provider have been met. For expenditure driven grants, receivables are recorded when the qualifying expenditures are incurred and all other grant requirements are met.

Water and Sewer fees are based on individual meter readings and are subject to penalties and interest if they are not paid by the respective due date. Unbilled user fees are estimated at year-end and are recorded as revenue in the current period.

Harbor fees are assessed based on an annual basis and the portion of the fees that relate to July 1 through December 31 is recorded as unearned revenue at June 30.

The allowance for uncollectible accounts has been estimated based on historical trends and is reflected as a reduction to the receivables in the asset section of the financial statements.

F. Inventories

Government-Wide and Fund Financial Statements

Inventories are recorded as expenditures at the time of purchase except in the Municipal Light Enterprise Fund where inventories of parts and accessories purchased for use in the utility business for construction, operation and maintenance purposes are stated at average cost, which approximates market value at December 31, 2009. Such inventories of both the Governmental Funds and Enterprise Funds, except the Municipal Light Fund, are not material in total to the basic financial statements and therefore are not reported.

G. Capital Assets

Government-Wide and Fund Financial Statements

Capital assets, which include land, construction in progress, piers, buildings, building improvements, machinery and equipment, and infrastructure (e.g., roads, water mains, sewer mains, and similar items), are reported in the applicable governmental, business-type activity and fiduciary column of the government-wide and fund based financial statements. Capital assets are recorded at historical cost or at estimated historical cost if actual historical cost is not available. Donated capital assets are recorded at the estimated fair market value at the date

of donation. Except for capital assets of the governmental activities column in the government-wide financial statements, construction period interest is capitalized on constructed capital assets.

All purchases and construction costs in excess of \$5,000, and with the expected useful lives of greater than one year, are capitalized at the date of acquisition or construction. Capital assets (excluding land and construction in progress) are depreciated on a straight-line basis.

The estimated useful lives of capital assets are as follows:

<u>Capital Asset Type</u>	<u>Estimated Useful Life (in years)</u>
Building improvements.....	6-20
Buildings.....	40
Infrastructure.....	5-50
Land improvements.....	10-30
Machinery and equipment.....	3-15
Piers.....	15-75

H. Compensated Absences

Government-Wide and Fund Financial Statements

Under the terms of various union contracts, Town employees are granted vacation and sick leave benefits in varying amounts. In the event of termination, an employee is paid for all accumulated vacation. Vacation earned in one year may be carried forward to be used in the following year. Town employees are granted a varying proportion of their unused sick leave upon death or retirement. Accumulated unpaid vacation, sick pay and other employee benefit amounts are reported as liabilities in the government-wide and enterprise financial statements.

I. Deferred Revenue

Deferred revenue at the fund financial statement level represents billed receivables that do not meet the available criterion in accordance with the current financial resources measurement focus and the modified accrual basis or accounting. Deferred revenue is recognized as revenue in the conversion to the government-wide (full accrual) financial statements.

J. Long-term Debt

Government-Wide and Proprietary Fund Financial Statements

Long-term debt is reported as liabilities in the government-wide and proprietary fund statement of net assets. Material bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

Governmental Fund Financial Statements

The face amount of governmental funds long-term debt is reported as other financing sources. Bond premiums and discounts, as well as issuance costs, are recognized in the current period. Bond premiums are reported as

other financing sources and bond discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual bond proceeds received, are reported as general government expenditures.

K. Net Assets and Fund Equity

Government-Wide Financial Statements (Net Assets)

Net assets are reported as restricted when amounts that are not available for appropriation or are legally restricted by outside parties for a specific future use.

Net assets reported as “invested in capital assets, net of related debt” includes capital assets, net of accumulated depreciation, less the principal balance of outstanding debt used to acquire capital assets. Unspent proceeds of capital related debt are not considered to be capital assets.

Net Assets has been “restricted for” the following:

Permanent Funds - Expendable represents the amount of realized and unrealized investment earnings of donor restricted trusts. The donor restrictions and trustee policies only allows the trustees to approve spending of the realized investment earnings that support governmental programs.

Permanent Funds - Nonexpendable represents the endowment portion of donor restricted trusts that support governmental programs.

Gifts and Grants - represents grants and gifts restricted by outside parties.

Fund Financial Statements (Fund Balance)

Fund balances are reserved for amounts that are not available for appropriation or are legally restricted by outside parties for a specific future use. Designations of fund balance represent tentative management plans that are subject to change.

Fund balances have been “reserved for” the following:

Reserved for Encumbrances and Continuing Appropriations represents amounts for uncompleted appropriations for special purposes and other commitments carried over to the ensuing fiscal year.

Reserved for Perpetual Permanent Funds represents amounts held in trust for which only investment earnings may be expended.

Fund balances have been “designated for” the following:

Subsequent Year's Expenditures are fund balance amounts budgeted for the next fiscal year to either reduce the tax levy or to be used for specific appropriations.

L. Investment Income

Investment income from Special Revenue, Capital Projects, and Agency Funds is legally assigned to the General Fund unless otherwise directed by Massachusetts General Law (MGL).

M. Total Columns

Government-Wide Financial Statements

The total column presented on the government-wide financial statements represents consolidated financial information.

Fund Financial Statements

The total column presented on the fund financial statements is presented only to facilitate financial analysis. Data in this column is not the equivalent of consolidated financial information.

N. On-Behalf Payments

Government-Wide and Fund Financial Statements

The Commonwealth makes contributions to a contributory retirement plan administered by the Massachusetts Teachers' Retirement Board (the "State Plan") on behalf of the Town's teaching employees. The Town is not legally required to contribute to the State Plan, which is fully funded by the Commonwealth. The accompanying basic financial statements include the required adjustments, which have increased both intergovernmental revenue and pension expenditures by the same amount. The effect of such an adjustment has not changed the excess of revenues and other financing sources over expenditures and other financing uses or fund balances.

O. Fund Deficits

In the Internal Service Fund, the Workers' Compensation Fund deficit of approximately \$269,415 will be funded by Town appropriations. This deficit is related to the estimate of future liability associated with long-term claims.

P. Use of Estimates

Government-Wide and Fund Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the basic financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

NOTE 2 – CASH AND INVESTMENTS

A cash and investment pool is maintained that is available for use by all funds. Each fund type's portion of this pool is displayed on the balance sheet as "Cash and cash equivalents." The deposits and investments of the trust funds are held separately from those of other funds.

Statutes authorize the investment in obligations of the U.S. Treasury, agencies, and instrumentalities, certificates of deposit, repurchase agreements, money market accounts, bank deposits and the State Treasurer's Investment Pool (the Pool). The Treasurer may also invest trust funds in securities, other than mortgages or collateral loans, which are legal for the investment of funds of savings banks under the laws of the Commonwealth.

The Pool meets the criteria of an external investment pool. The Pool is administered by the Massachusetts Municipal Depository Trust (MMDT), which was established by the Treasurer of the Commonwealth who serves as Trustee. The fair value of the position in the Pool is the same as the value of the Pool shares.

The Town's trust funds and retirement system have expanded investment powers including the ability to invest in equity securities, corporate bonds, annuities and other investments. The retirement system participates in the Pensions Reserves Investment Trust (PRIT) Fund which is a pooled investment fund that meets the criteria of an external investment pool. The Pension Reserves Investment Management (PRIM) Board is charged with the general supervision of the PRIT Fund. The fair value of the position in the PRIT fund is the same as the value of the PRIT shares.

Custodial Credit Risk – Deposits

In the case of deposits, this is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The Town does not have a deposit policy for custodial credit risk. At fiscal year-end, the carrying amount of deposits totaled \$35,539,083 and the bank balance totaled \$33,900,739. Of the bank balance, \$1,838,791 was covered by Federal Depository Insurance, \$3,738,395 was covered by the Depositors Insurance Fund, \$26,944,777 was collateralized and \$1,378,776 was exposed to custodial credit risk because it was uninsured and uncollateralized. During fiscal year 2010, the Town entered into a new collateralization agreement with its primary depository bank which greatly reduced the amount of deposits exposed to custodial credit risk compared to prior years.

At December 31, 2009, the carrying amount of deposits for the System totaled \$138,973 and the bank balance of \$165,239 was fully covered by Federal Depository Insurance.

Investments

At fiscal year end, the Town and the System had the following investments:

Town balances at June 30, 2010:

Investment Type	<u>Fair Value</u>
<u>Other Investments</u>	
Equity Securities.....	\$ 969,315
MMDT.....	<u>9,957,592</u>
Total Investments.....	<u>\$ 10,926,907</u>

System balances at December 31, 2009:

Investment Type	<u>Fair Value</u>
PRIT.....	<u>\$ 69,014,595</u>

The Town participates in the MMDT Cash Portfolio. MMDT maintains a cash portfolio and a short-term bond portfolio with combined average maturities of approximately 3 months. Credit ratings associated with the Town's investment in MMDT ranged from A1/P1 to unrated; with approximately 98% rated A1/P1 and approximately 2% rated A2/P2.

The System participates in PRIT. The effective weighted duration rate for PRIT investments ranged from .08 to 8.58 years.

Custodial Credit Risk – Investments

For investments, custodial credit risk is the risk that, in the event of a failure by the counterparty, the government will not be able to recover the value of its investments or collateral security that are in the possession of an outside party. The Town does not have any custodial credit risk exposure as of June 30, 2010 because the \$969,315 in equity securities are held by the Town and the \$9,957,592 in shares of MMDT are not subject to custodial credit risk because they are not evidenced by securities that exist in physical or book entry form.

The Town has not adopted a formal policy related to custodial credit risk.

At December 31, 2009, the System's \$69,014,595 investment in PRIT is not subject to custodial credit risk exposure because it is not evidenced by securities that exist in physical or book-entry form.

The System has not adopted a formal policy related to custodial credit risk.

Interest Rate Risk

Neither the Town nor the System has a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

Credit Risk

The Town has not adopted a formal policy related to Credit Risk. The Town's investments in MMDT are unrated.

The System has not adopted a formal policy related to Credit Risk. The System's investments in PRIT are unrated.

Concentration of Credit Risk

The Town and the System do not place a limit on the amount that may be invested in any one issuer.

NOTE 3 – RECEIVABLES

At June 30, 2010, receivables for the individual major and non-major governmental funds and the internal service funds; and the fiduciary funds in the aggregate, including the applicable allowance for uncollectible accounts are as follows:

GOVERNMENTAL, INTERNAL SERVICE AND FIDUCIARY FUNDS RECEIVABLES

	Gross Amount	Allowance for Uncollectibles	Net Amount
<u>Receivables:</u>			
Real estate and personal property taxes.....	\$ 509,099	\$ (5,931)	\$ 503,168
Real estate tax deferrals.....	661,027	-	661,027
Tax liens.....	276,216	-	276,216
Motor vehicle excise taxes.....	270,391	(128,158)	142,233
Interest and dividends.....	6,267	-	6,267
Departmental and other.....	73,489	(1,870)	71,619
Intergovernmental - pension fund.....	1,170,654	-	1,170,654
Intergovernmental - governmental funds.....	1,160,535	-	1,160,535
Total.....	<u>\$ 4,127,678</u>	<u>\$ (135,959)</u>	<u>\$ 3,991,719</u>

At June 30, 2010, receivables for the enterprise funds consist of the following:

ENTERPRISE FUND RECEIVABLES

	Gross Amount	Allowance for Uncollectibles	Net Amount
<u>Receivables:</u>			
Sewer user fees.....	\$ 797,051	\$ (18,603)	\$ 778,448
Water user fees.....	607,033	(14,162)	592,871
Harbor user fees.....	8,579	(1,716)	6,863
Municipal Light user fees (December 31, 2009).....	1,690,656	(389,002)	1,301,654
Boat excise.....	37,745	(1,887)	35,858
Total.....	<u>\$ 3,141,064</u>	<u>\$ (425,370)</u>	<u>\$ 2,715,694</u>

Deferred Revenue

Property taxes and other receivables in Governmental Funds that are measurable but not available have been classified as deferred revenue on June 30, 2010 as follows:

COMPONENTS OF DEFERRED REVENUE

	General Fund	Other Governmental Funds	Total
<u>Receivable and other asset type:</u>			
Real estate and personal property taxes.....	\$ 248,688	\$ -	\$ 248,688
Real estate tax deferrals.....	661,027	-	661,027
Tax liens.....	267,081	-	267,081
Motor vehicle excise taxes.....	95,119	-	95,119
Departmental and other.....	5,481	11,448	16,929
Intergovernmental.....	15,679	898,851	914,530
Total.....	<u>\$ 1,293,075</u>	<u>\$ 910,299</u>	<u>\$ 2,203,374</u>

NOTE 4 – INTERFUND TRANSFERS AND BALANCES

Interfund Receivables / Payables

Individual fund's interfund receivable and payable balances at June 30, 2010 are as follows:

Fund	Interfund Receivable	Interfund Payable
General Fund.....	\$ -	\$ 3,518,195 (1)
Enterprise Funds:		
Municipal Light, at December 31, 2009.....	2,408,338	-
Agency Funds.....	58,510	-
	2,466,848	3,518,195
Less: Municipal Light Fund Receivable at December 31, 2009.....	(2,408,338)	-
Less: General Fund Payable to Municipal Light Fund at June 30, 2010.....	-	(3,459,685)
Total	<u>\$ 58,510</u>	<u>\$ 58,510</u>

(1) Represents \$3,459,685 payable from the General Fund to the Municipal Light Fund for deposits held by the General Fund, which includes a timing difference of \$1,051,347 due to the reporting of the Municipal Light Fund as of December 31, 2009. The remaining \$58,510 is due to the Agency Funds related to timing of deposits held by the General Fund.

Funds are transferred from one fund to support expenditures of other funds in accordance with the authority established for the individual fund. Transfers within fund types have been eliminated. Transfers between fund types during the year ended June 30, 2010 were:

Transfers Out	Transfers In			Total	
	General Fund	Capital Projects Fund	Nonmajor Governmental Funds		
General.....	\$ -	\$ -	\$ 100,149	\$ 100,149	(1)

Total depreciation expense - business-type activities..... \$ 1,880,552

NOTE 6 – SHORT-TERM FINANCING

The Town of Marblehead is authorized, through its Treasurer, to borrow in anticipation of taxes (TANS), to fund capital project costs in anticipation of the issuance of bonds (BANS) or in anticipation of the receipt of federal (FANS) and state (SANS) grants.

During fiscal 2010 the Town has issued BAN's and they have been classified as long term. Refer to Note 7 for information regarding BANS classified as long-term debt as of June 30, 2010.

NOTE 7 – LONG-TERM DEBT

The Town of Marblehead's long-term debt issues constitute a pledge of the Town's full faith and credit. Payment is not limited to a particular revenue source. However, as previously noted, the Town's ability to raise property taxes is restricted by the enactment of legislation known as "Proposition 2½."

State law permits the Town, under the provisions of Chapter 44, Section 10, to authorize indebtedness up to a limit of 5% of its equalized valuation. Debt issued in accordance with this section of the law is designated as being "inside the debt limit." In addition, however, a Town may authorize debt in excess of that limit for specific purposes. Such debt, when issued, is designated as being "outside the debt limit."

The Town had \$11,782,000 of long-term BANS outstanding on June 30, 2009, which were refinanced during fiscal year 2010. The transaction is reported as a current refunding of debt which did not have an economic gain or loss.

The following is a summary of the long-term debt transactions of the Town for the year ended June 30, 2010:

General Obligation Bonds and Notes Payable Schedule - Governmental Funds

Project	Interest % Rate	Balance 6/30/09	Issued and Transferred	Redeemed	Balance 6/30/10

Total.....		\$ 43,600,210	\$ 20,900,000	\$ 21,159,388	\$ 43,340,822

Bonds and Notes Payable Schedule - Enterprise Funds

Project	Interest % Rate	Balance 6/30/09	Issued	Redeemed	Balance 6/30/10
Tucker's Building Remodeling.....	4.93	\$ 45,000	\$ -	\$ 45,000	\$ -

As of June 30, 2010, the Town has approximately \$2.327 million in Massachusetts School Building Authority (MSBA) reimbursements and unamortized premiums on bonds reserved in a special revenue fund to offset future interest expenses related to long-term bonds.

At fiscal year end the Town had \$14,400,000 in long-term BANs outstanding which were due on August 12, 2010. The long-term BANs consisted of the original \$11,782,000 from previous issuances and an additional \$2,618,000 in new BANs.

In August 2010 the Town issued \$12,000,000 of the maturing notes as long-term bonds and paid down \$718,000 of the \$14,400,000 in maturing long-term BANs with available funds. The remaining \$1,682,000 of long-term BANs outstanding at June 30, 2010, were combined with new funds of \$1,650,000 for a total new BAN of \$3,332,000 which matures August 12, 2011 with an interest rate of 2.00%. Since the maturity date on the reissued BANs extends over one year from the end of the fiscal year, the Town has classified this debt as long-term and has recorded a long-term liability.

Annual Requirements

The annual requirements to amortize all long-term debt outstanding as of June 30, 2010, are as follows:

Fiscal Year	Governmental		Total Requirement
	Exempt from Proposition 2 1/2		
	Principal	Interest	
2011	\$ 3,008,000	\$ 1,377,513	\$ 4,385,513
2012	3,807,000	1,801,202	5,608,202
2013	2,370,000	1,509,725	3,879,725
2014	2,415,000	1,415,845	3,830,845
2015	2,480,000	1,311,175	3,791,175
2016	2,550,000	1,200,850	3,750,850
2017	2,625,000	1,084,600	3,709,600
2018	2,710,000	964,500	3,674,500
2019	1,980,000	853,925	2,833,925

2027	720,000	125,425	845,425
2028	750,000	100,600	850,600
2029	780,000	73,825	853,825
2030	815,000	45,403	860,403
2031	845,000	15,316	860,316
Totals	\$ <u>42,480,000</u>	\$ <u>14,961,328</u>	\$ <u>57,441,328</u>

Bond Authorizations

Long-term debt authorizations voted by Town Meetings which have not been issued or rescinded as of June 30, 2010, are as follows:

<u>Date Authorized</u>	<u>Project</u>	<u>Amount</u>
May 2007	Transfer Station Planning.....	\$ 583,000
June 2008	Village School Reconstruction.....	21,130,113
June 2008	Glover School Feasibility Study.....	<u>395,000</u>
	Total.....	\$ <u>22,108,113</u> (a)

(a) Includes \$14,400,000 of BANs outstanding which have been classified as long-term obligations as of June 30, 2010.

Changes in Long-term Liabilities

During the fiscal year ended June 30, 2010, the following changes occurred in long-term liabilities:

	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year
Governmental Activities:					
Long-term bonds and notes.....	\$ 42,682,000	\$ 20,900,000	\$ (21,102,000)	\$ 42,480,000	\$ 3,008,000
Unamortized bond premium.....	918,210	141,195	(198,583)	860,822	57,388
Other postemployment benefits.....	3,773,377	8,028,607	(4,373,903)	7,428,081	-
Compensated absences.....	984,160	808,454	(776,862)	1,015,752	821,042
Landfill Closure.....	5,800,000	2,000,000	(200,000)	7,600,000	-
Workers' compensation.....	707,803	211,993	(217,440)	702,356	253,546
Total governmental activity long-term liabilities.....	<u>\$ 54,865,550</u>	<u>\$ 32,090,249</u>	<u>\$ (26,868,788)</u>	<u>\$ 60,087,011</u>	<u>\$ 4,139,976</u>
Business-Type Activities:					
Long-term bonds and notes.....	\$ 45,000	\$ -	\$ (45,000)	\$ -	\$ -
Other postemployment benefits.....	205,123	611,484	(298,097)	518,510	-
Compensated absences.....	281,476	176,727	(191,475)	266,728	191,327
Total business-type activity long-term liabilities.....	<u>\$ 531,599</u>	<u>\$ 788,211</u>	<u>\$ (534,572)</u>	<u>\$ 785,238</u>	<u>\$ 191,327</u>

Long-term liabilities related to both governmental and business-type activities are normally paid from the funds reporting payroll and related expenditures, which consist of the general fund and the sewer, water, and harbor enterprise funds.

NOTE 8 – PENSION PLANA. Defined Benefit Plan

Pensions for employees other than School Department teaching staff and certain school administrators are provided through the Town of Marblehead Contributory Retirement System (the System), a cost-sharing multiple employer defined benefit plan, administered by the Marblehead Contributory Retirement Board. Massachusetts contributory retirement system benefits are uniform from system to system, including the Massachusetts Teachers Retirement System. The System provides for retirement allowance benefits up to a maximum of 80% of a participant's highest three-year average annual rate of regular compensation, as defined. Benefit payments are based upon a participant's age, length of creditable service, level of compensation, and group classification.

Employees who are employed on a basis, which anticipates work at an annual rate to exceed 1,040 hours, are eligible to participate from the date of their employment. Participants' contributions are fully vested at all times. A superannuation allowance may be received upon completion of twenty years of service or upon reaching the age of 55 with ten years of service. Normal retirement for most employees occurs at age 65 (for certain hazardous duty and public safety positions, normal retirement is at age 55).

As of December 31, 2009, the System’s membership consisted of:

Retirees and beneficiaries currently receiving benefits.....	326
Active employees.....	352
Inactive employees.....	<u>49</u>
Total.....	<u><u>727</u></u>

Participants who become permanently and totally disabled from further duty may be eligible to receive a disability retirement allowance. The amount of benefits to be received in such cases is dependent upon several factors, including whether the disability is work-related, the participant’s age, years of creditable service, level of compensation, veteran status, and group classification.

Participants who resign from service and who are not eligible to receive a retirement allowance are entitled to request a refund of their accumulated contributions. In addition, such employees are entitled to receive interest which has accrued on those contributions. Employees who involuntarily terminate are entitled to regular interest on their accumulated contributions. Those who voluntarily terminate with less than 10 years of service are entitled to 3% interest on their accumulated contributions and those voluntarily terminating with greater than 10 years of service are entitled to regular interest.

Survivor benefits are extended to eligible beneficiaries of participants whose deaths occur prior to or following retirement.

From time to time, cost-of-living increases are granted to benefits being paid to retirees. These increases are expressed as a percentage of the retiree’s allowance, subject to a maximum dollar increase (presently \$12,000). The Massachusetts legislature voted these increases until 1997, and the cost was borne by the System until 1980 and from 1981 to 1997 are the financial responsibility of the Commonwealth. Since July 1, 1998, the Town Retirement Board is authorized to vote to award annual cost-of-living increases up to a maximum of 3% which are the financial responsibility of the System.

State Legislation requires that both the employee and the Town contribute to the System. Employees contribute an amount equal to 5%, 7%, 8% or 9% of their base salary, based on the date hired. Active participants who were hired on or after January 1, 1979 contribute an additional 2% of salary in excess of \$30,000. The Town is required to contribute at an actuarially determined rate, which is the amount required to cover normal cost plus amortization of unfunded prior service cost as approved by the Commonwealth’s Public Employee Retirement Administration Commission. The Town’s contributions for each employee (and interest allocated to the employee’s account) are fully vested after ten years of continuous service.

School Department teaching staff and certain administrators contribute to a pension plan administered by the Massachusetts Teachers Retirement Board. The Town makes no contributions to this plan. Contributions are made by the Commonwealth of Massachusetts as required by law. The amount of these on-behalf payments totaled \$6,082,665 for the fiscal year ended June 30, 2010. Employees in this plan are vested after ten years of service. Employer contributions are funded based on a funding schedule as approved by the Commonwealth’s Public Employee Retirement Administration Commission.

The system may be amended or terminated in whole or in part at any time by the Massachusetts Legislature, provided that no such modification, amendment or termination will be made that would deprive a current member of superannuation pension rights or benefits provided under applicable laws of the Commonwealth, if such member has paid the stipulated contributions specified in sections or provisions of such laws.

The System issues a publicly available financial report in accordance with guidelines established by the PERAC. That report may be obtained from the System located at 7 Widger Road, Marblehead, MA 01945.

B. Summary of Significant Accounting Policies

Basis of Accounting - The Marblehead Contributory Retirement System (the System) follows the policies mandated by the Commonwealth of Massachusetts. Its accounting records are maintained on the accrual basis. Town and participant contributions are recognized in the period in which the contributions are due. Benefits and refunds are recognized when due and payable in accordance with the terms of Massachusetts General Law and the plan.

Method Used to Value Investments - Plan investments are reported at fair value. Short-term investments are reported at cost, which approximates fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future plan principal and interest payments, and are discounted at prevailing interest rates for similar instruments. The fair value of real estate investments is based upon independent appraisals. Investments that do not have an established market are reported at estimated fair values.

C. Funding Status and Progress

The most recent actuarial valuation of the System was prepared as of January 1, 2010. Additional information as of the latest actuarial valuation follows:

- Actuarial cost method..... Individual entry age normal
- Amortization method..... 4.5% Increasing amortization using a level percentage of projected payroll
- Remaining closed amortization period... 20 years from January 1, 2010
- Asset valuation method..... Asset Smoothing
- Actuarial assumptions:
 - Investment rate of return..... 8%
 - Projected salary increases..... 3% (2010), 3.5% (2011-2014), and 4% (2015 and beyond)
 - Cost-of-living adjustments..... 3% on first \$12,000 of retirement income

D. Contributions Required and Contributions Made

The System's funding policy provides for semi-annual employer contributions at actuarially determined rates that expressed as percentages of annual covered payroll, are sufficient to accumulate assets to pay benefits when due, based on the above assumptions. Level percentage of payroll employer contribution rates is determined using the entry age normal actuarial cost funding method. The Retirement Plan will amortize the unfunded liability over a 20-year period.

Generally accepted accounting principles require that the minimum cost charged each year by the Town for its pension obligation should be the present value of benefits estimated to be payable in the future, (computed using an acceptable actuarial valuation method using assumptions that reflect the best judgments of future events, including salary projections) plus amortization of the liability for past services, as of the balance sheet date.

Employer appropriation, required for the last three fiscal years are as follows:

Fiscal Year	Required Contribution	Percent Contributed
2010	\$ 2,305,578	98.22%
2009	2,300,130	97.99%
2008	2,220,739	97.99%

E. Funding Status and Historical Data

An analysis of the funding progress since 1998 is as follows:

Actuarial Valuation As of	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a % of Covered Payroll ((b-a)/c)
01/01/10	\$ 77,353,879	\$ 98,858,864	\$ 21,504,985	78.2%	\$ 16,244,071	132.4%
01/01/08	84,442,905	93,908,490	9,465,585	89.9%	15,827,608	59.8%
01/01/06	69,105,082	82,948,269	13,843,187	83.3%	14,159,647	97.8%
01/01/04	64,490,373	76,875,640	12,385,267	83.9%	13,982,752	88.6%
01/01/02	60,615,356	71,022,123	10,406,767	85.3%	13,268,405	78.4%
01/01/00	54,015,622	63,939,027	9,923,405	84.5%	11,833,509	83.9%
01/01/98	42,540,310	55,347,500	12,807,190	76.9%	10,533,300	121.6%

F. Schedule of Funding Progress

The schedule of progress, presented as required supplementary information, following the notes to the basic financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits. Additionally, the schedule of employer contributions, presented as required supplementary information, following the notes to the basic financial statements, presents multiyear trend information for required and actual contributions relating to the cost-sharing plan as a whole, of which the Town is one participating employer, as well as the Town’s proportionate share of the plan’s annual contributions. This information is designed to be helpful for understanding the scale of the information presented relative to the Town.

G. Noncontributory Retirement Plan

The Town also has a noncontributory pension plan which covers certain employees hired prior to the adoption of the Contributory Retirement System. Total payments for the Town’s share of this plan amounted to \$132,000 during the year ended June 30, 2010.

NOTE 9 – POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS

GASB *Statement 45*, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions (GASB 45) was implemented in fiscal year 2009. As allowed by GASB 45, the Town has established the net Other Postemployment Benefits (OPEB) obligation at zero at the beginning of the transition year and has applied the measurement and recognition requirements of GASB 45 on a prospective basis.

Plan Description – The Town of Marblehead administers a single-employer defined benefit healthcare plan (“the Retiree Health Plan”). The plan provides lifetime healthcare insurance for eligible retirees and their spouses through the Town’s group health insurance plan, which covers both active and retired members. Chapter 32B of the MGL assigns authority to establish and amend benefit provisions of the plan. Benefit provisions are negotiated between the Town and the unions representing Town employees and are renegotiated each bargaining period. The Retiree Health Plan does not issue a publicly available financial report.

Funding Policy – The Town’s required contribution is based on a pay-as-you-go financing requirement. The Town contributes 60-80 percent of the cost of pre-Medicare coverage and 75 percent of the cost of the Medex plan and Medicare Part B. Plan members receiving benefits contribute the remaining 20-40 percent of the cost of pre-Medicare and 25 percent of the cost of Medex plan and Medicare Part B. For fiscal year 2010, the Town contributed \$4.7 million to the plan, and member contributions totaled \$1.3 million.

Annual OPEB Cost and Net OPEB Obligation – The Town’s annual other postemployment benefit (OPEB) cost (expense) is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The components of the Town’s annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the Town’s net OPEB obligation are summarized in the following table:

Annual required contribution.....	\$	8,505,000
Interest on net OPEB obligation.....		179,033
Adjustments to annual required contribution.....		(244,442)
*Adjustment for Electric Light Department.....		200,500
Annual OPEB cost (expense).....		<u>8,640,091</u>
Contributions made.....		<u>(4,672,000)</u>
Increase in net OPEB obligation.....		3,968,091
Net OPEB obligation-beginning of year.....		<u>3,978,500</u>
Net OPEB obligation-end of year.....	\$	<u><u>7,946,591</u></u>

*Electric Light amounts are shown for the six months ended December 31, 2009.

The Town’s annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for fiscal year 2010 was as follows:

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Contributed</u>	<u>Net OPEB Obligation</u>
6/30/2010	\$ 8,640,091	54%	\$ 7,946,591
6/30/2009	8,304,500	53%	3,978,500

Funded Status and Funding Progress – As of July 1, 2008, the most recent actuarial valuation date, the actuarial accrued liability for benefits was \$116.9 million, all of which was unfunded. The covered payroll (annual payroll of active employees covered by the plan) was \$34.4 million, and the ratio of the UAAL to the covered payroll was 339.8%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions – Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the July 1, 2008, actuarial valuation, actuarial liabilities were determined using the entry age normal cost method. The actuarial assumptions included a 4.5% investment return assumption, which is based on the expected yield on the assets of the Town, calculated based on the funded level of the plan at the valuation date, and an annual medical/drug cost trend rate of 10.5% initially, graded to 5% over 5 years. The UAAL is being amortized over a 30 year closed period using a level percentage of projected payroll, with amortization payments increasing at 4.5% per year.

NOTE 10 – COMMITMENTS

The Town has various commitments through its participation in a bulk power supply agency, as discussed more fully in Note 12.

In May of 2008, the Town voted to authorize the Treasurer to borrow \$395,000, and \$21,766,993, to finance a feasibility study for the Glover School Renovation project, and for the implementation of the Village School Renovation project, respectively. The Town has been approved by the Massachusetts School Building Authority (MSBA) for reimbursement of not less than 40% of the eligible costs associated with these projects, provided that the Town complies with all necessary steps set forth by the MSBA. In fiscal year 2010, the Town has made substantial progress of the Village School reconstruction project. Also in fiscal year 2009, the Town successfully completed the process of entering into a project funding agreement with the MSBA allowing for 40% reimbursement of eligible costs of this project. The Glover feasibility study has been completed and the Town is planning on securing funds to continue with the construction through fiscal year 2012.

NOTE 11 – CONTINGENCIES

The Town participates in a number of federal and state assisted grant programs, principal of which are educational grants. These programs are subject to program compliance and audits by the grantors or their representatives. The amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although the Town expects such amounts, if any, to be immaterial.

There are several pending lawsuits in which the Town is involved. The Town Counsel estimates that the potential claims against the Town, resulting from such litigation, which are not covered by insurance, would not materially effect the financial statements of the Town.

NOTE 12 – PARTICIPATION IN MASSACHUSETTS MUNICIPAL WHOLESALE ELECTRIC COMPANY

The Town of Marblehead acting through its Municipal Light Department is a Participant in certain Projects of the Massachusetts Municipal Wholesale Electric Company (MMWEC).

MMWEC is a public corporation and political subdivision of the Commonwealth of Massachusetts created as a means to develop a bulk power supply for its Members and other utilities. MMWEC is authorized to construct, own or purchase ownership interests in and to issue revenue bonds to finance electric facilities (Projects). MMWEC has acquired ownership interests in electric facilities operated by other utilities and also owns and operates its own electric facilities. MMWEC sells all of the capability (Project Capability) of each of its Projects to its Members and other utilities (Project Participants) under Power Sales Agreements (PSAs).

Among other things, the PSAs require each Project Participant to pay its pro rata share of MMWEC's costs related to the Project, which costs include debt service on the revenue bonds issued by MMWEC to finance the Project, plus 10% of MMWEC's debt service to be paid into a Reserve and Contingency Fund. In addition, should any Project Participant fail to make payment when due, other Project Participants may be required to increase (step-up) their payments and correspondingly their Participants' share of Project Capability to an additional amount not to exceed 25% of their original Participants' share of the Project Capability. Project Participants have covenanted to fix, revise, and collect rates at least sufficient to meet their obligations under the PSAs.

MMWEC has issued separate issues of bonds for each of its eight Projects, which are payable solely from, and secured solely by, the revenues derived from the Project to which the bonds relate plus available funds pledged under the Amended and Restated General Bond Resolution (GBR) with respect to the bonds of that Project. The MMWEC revenues derived from each Project are used solely to provide for the payment of the bonds of any bond issue relating to such Project and to pay MMWEC's cost of owning and operating such Project and are not used to provide for the payment of the bonds of any bond issue relating to any other Project.

MMWEC operates the Stony Brook Intermediate Project and the Stony Brook Peaking Project fossil-fueled power plants. MMWEC has a 3.7% interest in the W.F. Wyman Unit No. 4 plant, owned and operated by FPL Energy Wyman IV, a subsidiary of FPL Energy, Inc. and a 4.8% ownership interest in the Millstone Unit 3 nuclear unit operated by Dominion Nuclear Connecticut, Inc. (DNCI) the majority owner and an indirect subsidiary of Dominion Resources, Inc. DNCI also owns and operates Millstone Unit 2 nuclear unit. The operating license for Milestone Unit 3 nuclear unit extends to November 25, 2045.

A substantial portion of MMWEC's plant investment and financing program is an 11.6% ownership interest in the Seabrook Station nuclear generating unit operated by FPL Energy Seabrook, LLC, (FPLE Seabrook), the majority owner and an indirect subsidiary of FPL Group, Inc. The operating license for Seabrook Station extends to March 2030. FPLE Seabrook has stated its intention to request an extension of the Seabrook Station operating license beyond March 2030.

Pursuant to the PSAs the MMWEC Seabrook and Millstone Project Participants are liable for their proportionate share of the costs associated with decommissioning the plants, which costs are being funded through monthly Project billings. The Project Participants are liable for their proportionate share of the uninsured costs of a nuclear incident that might be imposed under the Price-Anderson Act. Originally enacted in 1957, the act has been renewed several times. In July 2005, as part of the Energy Policy Act of 2005, Congress extended the Act until the end of 2025.

Marblehead Municipal Light Department has entered into PSAs and Power Purchase Agreements (PPAs) with MMWEC. Under both the PSAs and PPAs, the Department is required to make certain payments to MMWEC payable solely from Departmental revenues. Under the PSAs, each Participant is unconditionally obligated to

make payments due to MMWEC whether or not the Project(s) is completed or operating and notwithstanding the suspension or interruption of the output of the Project(s).

MMWEC is involved in various legal actions. In the opinion of management, the outcome of such litigation or claims will not have a material adverse effect on the financial position of the company.

As of December 31, 2009, total capital expenditures amounted to \$1,566,416,000 of which \$25,810,000 represents the amount associated with the Department's Project Capability in the Projects in which it participates, although such amount is not allocated to the Department. MMWEC's debt outstanding for the Projects includes Power Supply System Revenue Bonds totaling \$502,245,000, of which \$7,675,000 is associated with the Department's share of Project Capability of the Projects in which it participates, although such amount is not allocated to the Department. As of December 31, 2009, MMWEC's total future debt service requirement on outstanding bonds issued for the Projects is \$573,581,000, of which \$8,533,000 is anticipated to be billed to the Department in the future.

The estimated aggregate amount of Marblehead Municipal Light Department's required payments under the PSAs and PPAs, exclusive of the Reserve and Contingency Fund billings, to MMWEC at December 31, 2009, is shown below:

For years ended December 31,		<u>Annual Costs</u>
2010	\$	1,368,000
2011		1,342,000
2012		1,345,000
2013		1,280,000
2014		1,083,000
2015 to 2019		<u>2,115,000</u>
Total	\$	<u><u>8,533,000</u></u>

In addition, under the PSAs, the Department is required to pay MMWEC its share of the Operation and Maintenance (O&M) costs of the Projects in which it participates. The Department's total O&M costs including debt service under the PSAs were \$3,757,000 and \$3,807,000 for the years ended December 31, 2009 and 2008, respectively.

NOTE 13 – RISK FINANCING

The Town is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Town carries commercial insurance. The amount of claim settlements has not exceeded insurance coverage in any of the previous three fiscal years.

The Town is self-insured for its workers' compensation activities. These activities are accounted for in the Town's Internal Service Fund where revenues are recorded when earned and expenses are recorded when the liability is incurred.

During fiscal year 2009, the Town converted its health insurance plans to premium based which shifts the risk of insurance to a third party. The premium based plan took effect on July 1, 2008. The Town has paid all residual claims under the self-insured health plan that have been reported through June 30, 2010. The Town is responsible for paying any additional claims on the self-insured plan that may not have been reported as of June 30, 2010.

Changes in the reported liability since July 1, 2008, are as follows:

		<u>Balance at Beginning of Fiscal Year</u>	<u>Current Year Claims and Changes in Estimate</u>	<u>Claims Payments</u>	<u>Balance at Fiscal Year-End Currently Due</u>
Medical Claims					
Fiscal Year 2009	\$	783,645	\$ (288,883)	\$ (284,184)	\$ 210,578
Fiscal Year 2010		210,578	(99,769)	(5,520)	105,289
Medex Claims					
Fiscal Year 2009	\$	168,957	\$ 60,069	\$ (182,568)	\$ 46,458
Fiscal Year 2010		46,458	419,771	(443,001)	23,228

The Town provides statutory workers compensation benefits under a self-insurance plan. In fiscal 1989 the Town established a workers' compensation fund by accepting the provisions of Massachusetts General Laws, Chapter 40, Section 13a. A private consultant hired by the Town administers workers' compensation claims. Claims are recorded as expenses in the year payment is made. The Town estimates its future workers' compensation liability based on history and type and records the liability in the Internal Service Fund.

An analysis of workers compensation activity is presented below:

		<u>Balance at Beginning of Fiscal Year</u>	<u>Current Year Claims and Changes in Estimate</u>	<u>Claims Payments</u>	<u>Balance at Fiscal Year-End</u>	<u>Current Portion</u>
Fiscal Year 2009	\$	695,786	\$ 212,017	\$ (200,000)	\$ 707,803	\$ 227,286
Fiscal Year 2010		707,803	211,993	(217,440)	702,356	253,545

NOTE 14 – LANDFILL AND POSTCLOSURE CARE COSTS

State and federal laws and regulations require the Town to construct a final capping system on its inactive landfill located at the rear of the Transfer Station at 5 Woodfin Terrace and to perform certain maintenance and monitoring functions at the site after closure. The Town stopped accepting waste and closed the site in 1975 in accordance with the regulations in place at that time. Recently the Town was compelled to provide for the capping and monitoring of its landfill by an administrative consent order issued by the Department of Environmental Protection. The Town completed a study in order to estimate the cost of the landfill closure and postclosure care costs. As a result, the estimate of \$7.6 million has been recorded as a liability in the entity-wide financial statements. Actual costs may be higher due to inflation, changes in technology, or changes in applicable laws or regulations.

NOTE 15 – IMPLEMENTATION OF NEW GASB PRONOUNCEMENTS

During fiscal year 2010, the following GASB pronouncements were implemented:

- The GASB issued Statement #57, OPEB Measurements by Agent Employers and Agent Multiple-Employer Plans. Management elected to implement this standard early and this standard did not impact the basic financial statements.

- The GASB issued Statement #58, Accounting and Financial Reporting for Chapter 9 Bankruptcies. Management elected to implement this standard early and this standard did not impact the basic financial statements.

Other Future GASB Pronouncements:

- The GASB issued Statement #54, Fund Balance Reporting and Governmental Fund Type Definitions, which is required to be implemented in fiscal year 2011. Management believes this pronouncement will require additional disclosure and impact the basic financial statements.
- The GASB issued Statement #59, Financial Instruments Omnibus. The objective of this Statement is to update and improve existing standards regarding financial reporting and disclosure requirements of certain financial instruments and external investment pools for which significant issues have been identified in practice. The provisions of this Statement are effective for financial statements for periods beginning after June 15, 2010.

Required Supplementary Information

General Fund

The General Fund is used to account for all transactions encompassing the approved current operating budget, the related revenues, expenditures, assets, liabilities and fund balances which are not accounted for in other funds. The budget of the Town is recorded in detail in the general fund by line item within department and, as a result, most of the current operations of the Town are recorded here.

Retirement System Schedules of Funding Progress and Employer Contributions

The Retirement System Schedule of Funding progress presents multiyear trend information relating to the cost-sharing plan as a whole, of which the Town is one participating employer, about whether the actuarial value of planned assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

The Retirement System Schedule of Employer Contributions presents multiyear trend information for required and actual contributions relating to the cost-sharing plan as a whole, of which the Town is one participating employer, as well as the Town's proportionate share of the plan's annual contributions.

See notes to required supplementary information.

MARBLEHEAD CONTRIBUTORY RETIREMENT SYSTEM
SCHEDULE OF EMPLOYER CONTRIBUTIONS

Fiscal Year Ended June 30	System Wide			Town of Marblehead	
	Annual Required Contributions	(A) Actual Contributions	Percentage Contributed	(B) Actual Contributions	(B/A) Town's Percentage of System Wide Actual Contributions
2010	\$ 2,347,285	\$ 2,347,285	100%	\$ 2,305,578	98.22%
2009	2,347,286	2,347,286	100%	2,300,130	97.99%
2008	2,266,267	2,266,267	100%	2,220,739	97.99%
2007	2,274,000	2,274,000	100%	2,232,565	98.18%

The Town's Actual Contributions equaled 100% of its Required Contributions for each year presented.

See notes to required supplementary information.

Other Postemployment Benefits Plan Schedules

The Schedule of Funding Progress compares, over time, the actuarial accrued liability for benefits with the actuarial value of accumulated plan assets.

The Schedule of Employer Contributions presents, over time, the ratio of the actual annual employer contributions to the annual required contribution.

The Schedule of Actuarial Methods and Assumptions presents factors that significantly affect the identification of trends in the amounts reported.

OTHER POSTEMPLOYMENT BENEFIT PLAN
SCHEDULE OF FUNDING PROGRESS AND EMPLOYER CONTRIBUTIONS

Schedule of Funding Progress

Actuarial Valuation Date	Actuarial Value of Assets (A)	Actuarial Accrued Liability (AAL) Projected Unit Credit (B)	Unfunded AAL (UAAL) (B-A)	Funded Ratio (A/B)	Covered Payroll (C)	UAAL as a Percentage of Covered Payroll ((B-A)/C)
7/1/2008	\$ -	\$ 116,948,000	\$ 116,948,000	0%	\$ 34,447,000	339.5%

Schedule of Employer Contributions

Fiscal Year Ended	Annual Required Contribution (ARC)	Actual Contributions Made	Percentage of the ARC Contributed
2010	\$ 8,505,000	\$ 4,672,000	55%
2009	8,304,500	4,326,000	52%

See notes to required supplementary information.

OTHER POSTEMPLOYMENT BENEFIT PLAN
ACTUARIAL METHODS AND ASSUMPTIONS

Actuarial Methods:

Valuation date..... July 1, 2008
Actuarial cost method..... Entry Age Normal Cost Method
Amortization method..... Level percent of pay, assuming pay increases at 4.5%
Remaining amortization period..... 30 years as of July 1, 2008, closed

Actuarial Assumptions:

Investment rate of return..... 4.5%, pay-as-you-go scenario
Medical/drug cost trend rate..... 10.5% grading down to 5.0% over 5 years

Plan Membership:

Current retirees, beneficiaries, and dependents.....	647
Current active members.....	<u>744</u>
 Total.....	 <u><u>1,391</u></u>

See notes to required supplementary information.

NOTE A – STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

1. Budgetary information

During the fiscal year, the finance committee submits to the Town Meeting an operating budget for the proposed expenditures and other financing uses for the fiscal year commencing the following July 1st. The budget, as enacted by the Town Meeting, also establishes that certain appropriations are to be funded by particular revenues. The original budget is amended during the fiscal year at Special Town Meetings or at the next Annual Town Meeting held prior to the end of the fiscal year. During the fiscal year the finance committee may transfer funds for extraordinary or unforeseen expenditures. The Town appropriated \$144,000 for this purpose in fiscal 2010 and transfers of \$95,487 were made. All unencumbered and unexpended appropriations lapse at year-end.

Formal budgetary integration is employed as a management control device during the year for the General Fund. Although formal budgetary integration is not employed for Special Revenue Funds, effective budgetary control is alternatively achieved through provisions of the Massachusetts General Laws and the Town's by-laws.

Appropriations are authorized by the Town Meeting for line items within departments. Typical line items are salaries, expense, and local travel. These are the legal levels of budgetary control (level at which expenditures may not exceed budget). However, the Town is statutorily required to pay debt service, regardless of whether such amounts are appropriated. Additionally, expenditures for disasters, natural or otherwise, and final judgments may exceed the level of spending authorized by majority vote at a special Town Meeting.

2. Budgetary – GAAP Reporting Reconciliation

The budgetary basis and modified accrual basis of accounting are substantially the same.

A reconciliation of budgetary-basis to GAAP-basis results is as follows:

Net change in fund balance - budgetary basis.....	\$	874,217
Recognition of revenue for on-behalf payments.....		(6,082,665)
Recognition of expenditures for on-behalf payments.....		<u>6,082,665</u>
Net change in fund balance - GAAP basis (modified accrual)....	\$	<u><u>874,217</u></u>

3. Excess of Expenditures over Appropriations

For the fiscal year ended June 30, 2010, actual expenditures exceeded appropriations for snow removal and state and county assessments by \$144,035 and \$77,037, respectively. The snow approval appropriation deficit will be raised in fiscal year 2011 tax rate setting process as allowed by Massachusetts state finance law.

NOTE B – PENSION PLAN

Pensions for employees other than School Department teaching staff and certain school administrators are provided through the Town of Marblehead Contributory Retirement System (the System), a cost-sharing multiple employer defined benefit plan, administered by the Marblehead Contributory Retirement Board. Massachusetts contributory retirement system benefits are uniform from system to system, including the Massachusetts Teachers Retirement System. The System provides for retirement allowance benefits up to a maximum of 80% of a participant's highest three-year average annual rate of regular compensation, as defined. Benefit payments are based upon a participant's age, length of creditable service, level of compensation, and group classification.

The schedule of funding progress, presented as required supplementary information presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits. Additionally, the schedule of employer contributions, presented as required supplementary information presents multiyear trend information for required and actual contributions relating to the cost-sharing plan as a whole, of which the Town is one participating employer, as well as the Town's proportionate share of the plan's annual contributions. This information is designed to be helpful for understanding the scale of the information presented relative to the Town.

NOTE C - OTHER POSTEMPLOYMENT BENEFITS

The Town administers a single-employer defined benefit healthcare plan ("The Retiree Health Plan"). The plan provides lifetime healthcare insurance for eligible retirees and their spouses through the Town's group health insurance plan, which covers both active and retired members

The Town currently finances its other postemployment benefits (OPEB) on a pay-as-you-go basis. As a result, the funded ratio (actuarial value of assets expressed as a percentage of the actuarial accrued liability) is 0%. In accordance with Governmental Accounting Standards, the Town has recorded its OPEB cost equal to the actuarial determined annual required contribution (ARC) which includes the normal cost of providing benefits for the year and a component for the amortization of the total unfunded actuarial accrued liability of the plan.

The Schedule of Funding Progress presents multi-year trend information which compares, over time, the actuarial accrued liability for benefits with the actuarial value of accumulated plan assets.

The Schedule of Employer Contributions presents, over time, the ratio of the actual annual employer contributions to the annual required contribution.

Projections of benefits for financial reporting purposes are based on the substantive plan and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The Schedule of Actuarial Methods and Assumptions presents factors that significantly affect the identification of trends in the amounts reported.

Other Supplementary Information

Combining Statements

Nonmajor Governmental Funds

Special Revenue Funds:

Federal Grants - To account for grants from the Federal Government for various purposes. They are expended in accordance with the grant.

State Grants - To account for grants from the Commonwealth of Massachusetts for various purposes. They are expended in accordance with the grant.

Other Grants - To account for grants from individuals and foundations for various purposes. They are expended for the purpose designated by the grantor or benefactor.

Revolving Funds - To account for revolving funds specifically allowed by the laws of the Commonwealth of Massachusetts. These funds are expended for purposes specified by the enabling state statute or vote of the Town Meeting.

Receipts Reserved for Appropriation - To account for receipts set aside for specific purposes as allowed by the laws of the Commonwealth of Massachusetts. Receipts reserved for appropriation are transferred to the general fund when appropriated as part of the Town's annual budget.

Gifts - To account for receipts of various gifts and donations. They are expended for the purpose designated by the donor or benefactor.

Special Revenue Trust Funds - To account for contributions where both principal and investment earnings may be spent to support the government.

Statistical Section

Statistical tables differ from financial statements since they usually cover more than one fiscal year and may present nonaccounting data. The following tables reflect social and economic data, financial trends, and fiscal capacity.

Photo by Dana Snow

Located in the heart of the Town Of Marblehead's Historic District is the Old Town House which was built in 1727.

Statistical Section

Statistical Section

This part of the Town of Marblehead's comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Town's overall financial health.

Financial Trends

- These schedules contain trend information to help the reader understand how the Town's financial performance and well-being have changed over time.

Revenue Capacity

- These schedules contain information to help the reader assess the Town's most significant local revenue source, the property tax.

Debt Capacity

- These schedules present information to help the reader assess the affordability of the Town's current levels of outstanding debt and the Town's ability to issue additional debt in the future.

Demographic and Economic Information

- These schedules offer demographic and economic indicators to help the reader understand the environment within which the Town's financial activities take place.

Operating Information

- These schedules contain service and infrastructure data to help the reader understand how the information in the Town's financial report relates to the services the Town provides and the activities it performs.

SOURCES: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year. The Town implemented GASB Statement 34 in 2003; schedules presenting government-wide information include information beginning in that year.
